

Module-6 Ansible Assignment - 2

You have been asked to:

Create a script that can add the text "This text has been added by custom script" to /tmp.1.txt

Run this script using Ansible on all the hosts

Answer:

```
# cat script.sh
echo "This text has been added by the custom Script" > /tmp/1.txt

# cat createcustomScript.yaml
---
- name: Assignment 2 to create tmp text
  hosts: all
  become: true
  tasks:
    - name: Running the Script against all the servers
      script: script.sh
```

Above is the script and Ansible Playbook to create the /tmp/1.txt file in all the slaves.

```
$ ansible-playbook createcustomScript.yaml

PLAY [Assignment 2 to create tmp text] *****
TASK [Gathering Facts] *****
ok: [Slave1]
ok: [Slave2]

TASK [Running the Script against all the servers]
*****
changed: [Slave2]
changed: [Slave1]

PLAY RECAP *****
Slave1          : ok=2    changed=1    unreachable=0    failed=0
skipped=0      rescued=0    ignored=0
Slave2          : ok=2    changed=1    unreachable=0    failed=0
skipped=0      rescued=0    ignored=0
```

Successfully execute the Ansible Playbook against all the slave servers, it creates the text file.
